

NAME: PAVITHRA.R

REG NO: 192421369

EXPERIMENT 1.Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Gray-scale.

Aim

To read an image in Python and convert the image into a grayscale image using OpenCV.

Program

```
import cv2

# Read the image
image = cv2.imread("download.jpg")

# Check whether image was loaded
if image is None:
    print("Image not found!")
    exit()

# Convert image to grayscale
gray_image = cv2.cvtColor(image, cv2.COLOR_BGR2GRAY)

# Display original image
cv2.imshow("Original Image", image)

# Display grayscale image
cv2.imshow("Grayscale Image", gray_image)

# Wait for a key press
cv2.waitKey(0)
```

```
# Close all windows
```

```
cv2.destroyAllWindows()
```

INPUT

Output

Result

Thus, the image was successfully read using Python and converted into a grayscale image using OpenCV.
