EXPERIMENT 2. Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Blur using Gaussian Blur

Aim

To read an image in Python and apply Gaussian Blur to the image using OpenCV.

Program

```
import cv2

# Read the image
image = cv2.imread("download.jpg")

# Check whether image was loaded
if image is None:
    print("Image not found!")
    exit()

# Apply Gaussian Blur
blur_image = cv2.GaussianBlur(image, (15, 15), 0)

# Display original image
cv2.imshow("Original Image", image)

# Display blurred image
cv2.imshow("Gaussian Blur Image", blur_image)

# Wait for a key press
cv2.waitKey(0)
```

```
# Close all windows
```

```
cv2.destroyAllWindows()
```

INPUT

OUTPUT

Attach your screenshot here showing:

- Original Image
- Gaussian Blurred Image

Result

Thus, the image was successfully read and Gaussian Blur was applied using OpenCV.
